EXPERT REPORTS

ANIMAL HEALTH

Representatives of all animal health sectors gathered in Marrakesh to renew their commitment to the fight against antimicrobial resistance and to the prudent use of antimicrobial agents in animals.

The engagement of participants, country representatives and the OIE resulted in [recommendations](#), which represent the common action of all animal health stakeholders to ensuring the sustainability of livestock production and the maintenance of terrestrial and aquatic animal health and welfare. To strengthen international collaboration and coordination, the recommendations engage all stakeholders in the surveillance and monitoring of antimicrobial use and resistance, and to strengthen the economic case for sustainable investment; build national capacities of Member Countries; encourage priority research initiatives; and expand communication activities within national action plans to involve all stakeholders.
