The OIE hosted the first Global Conference on Biological Threat Reduction in Paris, 30 June – 2 July 2015.

For the purposes of the Conference, 'Biological Threats' or 'Biothreats' are threats that result from or are exacerbated by infectious diseases of animals (including zoonoses) which may arise from natural or manmade disasters, laboratory accidents or from the deliberate manipulation or release of pathogens.

The Conference, which was held in collaboration with the World Health Organization (WHO), brought together world leading scientists, educators, and key decision makers from international organisations and national governments. The participants who represented the public health, animal health, ecosystem health, and security sectors came from more than 80 countries.
