## PANORAMA

The OIE hosted the first Global Conference on Biological Threat Reduction in Paris, 30 June – 2 July 2015.

For the purposes of the Conference, 'Biological Threats' or 'Biothreats' are threats that result from or are exacerbated by infectious diseases of animals (including zoonoses) which may arise from natural or manmade disasters, laboratory accidents or from the deliberate manipulation or release of pathogens.

The Conference, which was held in collaboration with the World Health Organization (WHO), brought together world leading scientists, educators, and key decision makers from international organisations and national governments. The participants who represented the public health, animal health, ecosystem health, and security sectors came from more than 80 countries.

## Recommendations of the First OIE Global Conference on Biological Threat Reduction

Paris, France, 30 June - 2 July 2015

The OIE is an international organisation created in 1924 with a mandate from its 182 Member Countries to improve animal health and welfare. Its activities are permanently supported by 301 centres of scientific expertise and 12 regional offices with a presence on every continent.
